ZANOG IPv6 Action Group

Not a Working Group
Less talking more doing

donald@nog.net.za

28 August 2025 - ZANOG-GP

Other possible names

- Working group

- Strategy group

- Project team

- Advisory group

- Steering group

- Focus group

- Tiger team

- Brain trust / crew / squad

Vision

Higher adoption of IPv6 in South Africa (Africa) through small achievable steps.

Why?

How

Create small steps that networks can achieve

- Most networks see IPv6 as this huge beast and don't know where to start and so never start

- Plenty of resources available on how to deploy IPv6

  - However this action group could look at ways of doing meaningful training

- Get networks to setup IPv6 BGP sessions with their Transits and IXPs.

- Get networks to setup IPv6 BGP sessions with their Customers.

- Advertise your IPv6 prefix over your BGP sessions. This might naturally come with previous steps

What's the plan?

Get a task team together

Who
Dedicated Volunteers on roles to be defined

- Chair -

- IXP Operator liaison -

- Large transit provider champions

  - Liquid -

  - Workonline -

  - Seacom -

  - AS3741 -

- Secondary provider liaison -

- Measurement and stats collection –

- Tools and systems -

Next Action

Volunteer and share ideas
